

I want to support ESPA because

ESPA is an excellent example of a great organization that can promote safe paediatric anaesthesia practice across the European Anaesthetists by sharing their experiences in clinical practice and collaborating for research purposes. One of the fields of paediatric anaesthesia that deserves much more attention is paediatric procedural sedation and analgesia by anaesthetists or Monitored Anaesthesia Care outside the operating room. Many of us are involved in this sort of activities yet little is described from the European anaesthetists. It would be very useful to have the opportunity from ESPA to deepen in this field, to shed light to this not uncommon anaesthesiologist's activity, and to communicate through a platform of **DEDICATED PERSONS SUCH AS A SUBCOMMITTEE.**
