I submit my candidature to be re-elected as a member of the future Executive Board of ESPA.

I have been a pediatric anesthesiologist since 1993 and am currently Head of the Pediatric Anesthesia Department at Lille University Hospital in France. I have been a member of the board and President of the French Society of Pediatric Anesthesia, where I have been involved in organizing annual conferences, in publishing the latest national recommendations on pediatric anesthesia, and in participating in major European studies such as APRICOT and NECTARINE, for which I was the national coordinator for France.

I've been elected a member of the board of ESPA in 2020, and I am currently the Honorary Secretary. During this years, I've realized how important it was to support collaboration between different European countries on issues such as education and training in pediatric anesthesia, in order to improve the safety and quality of children care.

I wish to continue my contribution in the Board of ESPA, to continue promoting teaching, practice and training of paediatric anaesthesia in Europe, in particular by participating in the organization of annual conferences, to share experiences between European countries, and to encourage my French colleagues to be more active in this fields.

I thank you in advance for the confidence you will place in me in this mission.

Sincerely

Anne Laffargue
