

ESPA Re-Election

Nicola Groes Clausen

I am writing to formally express my interest in continuing as a member of the **Executive Board of the European Society for Paediatric Anaesthesiology (ESPA)**.

As a paediatric anaesthesiologist and associate professor at the University of Southern Denmark, I have dedicated my career to improving the safety, quality, and experience of anaesthesia care for children. My clinical work at Odense University Hospital, combined with research experience and my position as head of the pediatric anaesthesia section, has given me a strong foundation in both evidence-based practice and co-operation with many collaborating parties.

I have had the privilege of contributing to ESPA previously through my role on the Scientific Committee and especially organizing the scientific program at ESPA annual meetings, as a speaker at ESPA organized panels at ESAIC congresses, and as a host of ESPA-supported educational webinars. These experiences have deepened my appreciation for ESPA's mission and the collaborative spirit that defines our community.

I believe I can bring the following to the Executive Board:

- A strong commitment to **clinical excellence and patient safety**.
- Experience in **multidisciplinary research** and international collaboration.
- A passion for **education and knowledge-sharing**, especially in engaging younger colleagues and trainees.
- A strategic mindset focused on **equity, accessibility, and innovation** in paediatric anaesthesia across Europe.
- Experience in planning scientific and educational content for ESPA congress

I am particularly interested in helping ESPA expand its outreach to underrepresented regions, strengthen its educational platforms, and support the next generation of paediatric anaesthesiologists.

I would be honoured to serve and contribute to ESPA's continued growth and impact.
