

## **Workshop pain management I – Perioperative pain management after day case surgery**

Participants will in small groups under the supervision of a tutor develop a concept of perioperative pain management following international standards. In this workshop we will focus on day case surgery procedures under the consideration of the special conditions and needs of these patients. This will also include regional and local anaesthetic techniques and measurement of pain.

## **Workshop pain management II – Perioperative pain management after major surgery**

Participants will in small groups under the supervision of a tutor develop a concept of perioperative pain management following international standards. In this workshop we will focus on major surgical procedures including preoperative planning of intra- and postoperative pain management. This will also include regional and anaesthetic techniques, patient controlled analgesia and measurement of pain.
